The theme for this event is **“Monk × Career”**, and we will look into the lives of our two guest speakers about their various talents and experiences with their jobs in correlation to the surrounding regions and people that they serve.

Through the various experiences that our two guest speakers have had in their careers, what and how exactly can we find our own **“happiness”** through our defined roles? Could it be that we must love our job to enjoy what we do on the daily? Or is it because the drive to keep and preserve the culture in our industry is what leads us to create that **“happiness”**?

For those who are lost in the ever-long road of career development, fear not!
In this event, we will have 90 minutes to discuss various topics and help you find what's important to you in your career development journey!

※Parallel Career is a term created by the world renowned father of modern business writer Peter Ferdinand Druck(PF Drucker), which supports the idea of having a 2nd career without throwing away the career you originally had.
